1950

GENERAL LIST

LA ROCHETTE NURSERY

VICTOR REITER, JR.

1195 Stanyan Street
San Francisco 17,
California

LOmbard 6-2929

For descriptions of our new creations for
1950 please consult our special novelty list.

NEW ADDITIONS TO THE GENERAL LIST:

DR. JULES WELCH (Evans) A very crisp double flower with petals marbled purple, magenta and rose with rose sepals. A low bushy grower with leathery foliage. This plant is said to be outstanding in warmer areas but it may lack vigor in cooler climates. A flower of the finest substance.

MRS. W. P. WOOD (W. P. Wood) A small-flowered pale rose near-white single of great vigor. This variety is similar to *F. Magellanica* *Molinae* (*macrostemma alba*) but the flowers are larger, the foliage is sparser and the bloom is much more free. We imported this one from England through the courtesy of Mr. W. P. Wood.

SAN PABLO (Crumley) A pale orchid sport of the hanging variety San Mateo discovered and introduced by Crumley's Nursery of San Pablo. Positively sensational with its trailing branches smothered in huge orchid and lavender flowers. A must.

Please Note: All our 1949 Fuchsia introductions with the exception of Flying Cloud have been incorporated in the General List at the same standard price as all older varieties. The variety Flying Cloud, because of its short supply and its merit is being maintained at the higher price of the 1950 introductions.

DOUBLE "PURPLE" GROUP

- * **CHRYSANTHEA**—easy, full trailer, red and purple.
- # **COMMANDER IN CHIEF**—largest red and purple.
